

*On October 1, 2020, the Havre Public School District was notified that an individual associated with the District had tested positive for COVID-19. The positive test was confirmed late Thursday night. According to the Hill County Health Department, the District's staff and students were in contact with the individual during the period of possible exposure. The individual last had contact with others in our school district at Havre High School on Monday, September 28, three days prior to the individual's diagnosis. Since Monday, the individual has not been at the school.*

*If any person associated with the District is at risk of exposure, the Hill County Health Department will be in contact with that person to determine a safe and appropriate course of action. It is still recommended that any person who feels sick or ill, seek out their medical provider for specific instructions. The School District is in contact with the Health Department and reviewing the Centers for Disease Control guidance to complete cleaning the school and other related facilities. The other steps taken by the School District include the continuation of social/physical distancing, the use of face coverings, and frequent hand washing and hand sanitizing. Contact the Superintendent for details about these measures. School officials will continue to monitor the situation and will provide further information if and when it becomes available.*
