

We are excited to announce the arrival of Google Apps for Education at Havre Public Schools. We have found many exciting and convenient features for students, families, and staff. Along with being able to view lesson plans and assignments created within Google Classroom, students will also have access to Google Docs, Google Slides, and Google Sheets. Students will be able to load their school profiles on any device in order to complete school work wherever they may have internet capability. Families may need to download the free Google Chrome browser on home computers and laptops in order to access student accounts. Google also offers free applications for many tablet and smart phone devices. When logging into the google student account please follow the naming and password conventions shown below. Thank you!
